
Vintage T Shirts

Posted by Bob Kennedy - 2008/06/15 00:19

I am trying to find out the best way to print a T Shirt so that the image looks old, faded and washed out.

Can anyone help?

Thanks

Bob

My good friend Artem from Midiprint in Russia suggests that there are several options to approach the effect you need.

Prepare design files using filters, brushes and other Photoshop plug-ins to age the image.

Using special inks which specially crack after washing or stretching.

You can use both above mentioned options to get a nice effect you are talking about.

Thanks for that info.

Appreciated!
